

INCREASED ACCURACY AND QUALITY

CNC Techno 4896 Router A Revolutionary New Way to Cut Inserts!

With the introduction of the LS 4896 Techno CNC Router, US Case made a BIG move towards offering its customers even MORE solutions.

US Case has long been the standard of custom case and foam design and fabrication of the Mid Atlantic region. Now with the Techno 4896 CNC router in house, orders that would have taken days in the past *now take mere minutes to achieve.*

Using this programmable router we have increased our accuracy and quality many fold. We are now able to do our main foam insert work in house. The design options are increasing daily with new doghouses for the audio industry, new inserts for the medical devices cases, and quicker service for all.
